18 MR. KOENIGSDORF: I think the most important
19 thing at this point is transportation from Point A to
20 Point B. Since we have what, 70-some-odd locations
21 that this stuff is coming from, it's pretty evident
22 like the Twin Towers being attacked and leveled, that
23 the security is not as it should be. I can't remember
24 how many truckloads they figure it's going to take to
25 some out here, but it was, I think, in the thousands,
0209

1 if I'm not mistaken. Just that alone is frightening.
2 Then the routes -- God forbid you have a leak, you
3 know.

4 Now, it's not like the Yucca Mountain. You
5 could have a leak and may not have a problem for 200,
6 300 years. You have a problem on that truck, you got a
7 problem now. And when we're transporting that many
8 truckloads of stuff, accidents are going to happen,
9 whether we like it or not, whether it be a vehicle to a
10 truck or something to cause one of those containers to
11 leak. Then you've got an immediate problem.

12 You've got an area -- I don't know with this
13 unspent stuff, what are we looking at if something was

552441

14 to get out these containers. What are we looking at,
15 years? Maybe a couple hundred years where nobody could
16 ever live there?

17 So, these are very touchy subjects. Coming
18 into town, we got to go through Vegas or maybe we come
19 the northern way into town, but the roads are two-lane.
20 We got a lot of sleepy people, fall asleep, and they
21 could run into that convoy. You got a problem. I
22 think the roads coming here locally are not, they
23 should be separating highways for this kind of
24 transport of material. So we're really not -- we're
25 not game to transport yet. I'm sure that might be an

0210

1 issue that you guys are aware of.

2 As far as Yucca Mountain goes, that's, hey,
3 you'd probably have to stick it there 50 or 100 years
4 before you know whether you're going to really have a
5 problem or not. So when I say I got a concern, hey, I
6 got a concern for maybe my grandkids, maybe my
7 great-grandkids, and I got a concern for my community.
8 My personal feeling -- I'd like to see this stuff stay
9 where it's at for the chance that the technology will
10 catch up to it and we can use the unspent fuel for

552441

11 something else that would benefit the communities right

12 where it's at.

13 And now I'm going to shut up. And say thank

14 you.

15 MS. SWEENEY: If I could ask you, sir, could

16 you give your name and spell it so the Court Reporter

17 has it?

18 MR. KOENIGSDORF: It's Robert Koenigsdorf.

19 K-O-E-N-I-G-S-D-O-R-F. Do you want my address?

20 MS. SWEENEY: If you'd like to give it,

21 you're welcome to.

22 MR. KOENIGSDORF: 3200 East Winery Road,

23 Pahrump, 89048.

24 MS. SWEENEY: Thank you, sir.

25 MR. KOENIGSDORF: I'm sure you're going to

0211

1 hear that many times. Thank you.
